To,
The Hiring Manager
Capgemini Engineering

Subject: Application for the Position of Java Developer

Dear Hiring Manager,

I am writing to express my interest in the Java Developer role at Capgemini Engineering. As an aspiring full-stack developer with strong Java, Spring Boot, and Microservices experience, I am excited about the opportunity to contribute to Capgemini's mission of delivering innovative engineering and digital solutions across industries.

During my academic journey at Zeal College of Engineering & Research, Pune, I developed a solid foundation in Java, Spring Boot, RESTful API design, and MySQL. My project *FinTrack – Personal Finance Manager* demonstrated my ability to design scalable and efficient applications using JavaFX, Spring Boot, and relational databases. Additionally, my internship at EY GDS Pune helped me gain hands-on experience in React.js and Express.js, emphasizing team collaboration, CI/CD practices, and code maintainability — qualities that align closely with Capgemini's engineering standards.

I am particularly drawn to Capgemini's focus on innovation and sustainability. The opportunity to work on impactful technologies — from AI-driven systems to digital transformation solutions — deeply resonates with my passion for building software that improves lives. I value Capgemini's inclusive culture, continuous learning environment, and its dedication to responsible engineering.

I believe my technical expertise in Java, Spring Boot, REST APIs, MySQL, and my problem-solving mindset make me a strong fit for this role. I am eager to contribute to your dynamic team and grow within an organization that fosters excellence, innovation, and collaboration.

Thank you for considering my application. I look forward to the opportunity to discuss how my skills and enthusiasm align with Capgemini's vision.

Warm regards,
Ved Pawar
